Compact discs and spacious sound from Bose

You've seen all the claims about compact discs, now it's time to put them to the test. Go into your local Bose dealer and listen to a compact disc played through a Bose Direct/Reflecting Speaker System. Only Bose speakers produce a combination of reflected and direct sound, similar to what you hear at a live concert. They create an imaginary concert stage which recreates the spacious, lifelike performance captured by these new compact discs. So go into your local Bose dealer, and judge for yourself. Reading may be believing, but listening is proof.
